

- 1) **Each team** needs to provide the followings:
 - a. The slide deck of their presentation a day before the presentation day (Email to course instructor).
 - b. The presentation showed focus “how you did it” and not on “how the technique works”.
 - c. 12 minutes of presentation (4 minutes per team member)
 - d. 3 minutes of answering the questions (all team members)

- 2) **Each team** should submit the source code file, the binary code file, and a short report on the project outcome as a zip file on Moodle. The report should include:
 - a. The status of the project (Fully functional, partially functional, Not functional, etc.
 - b. A flowchart of the produced code
 - c. A brief user manual providing the details on how to use the package, input(s), output(s), etc.
 - d. A list of suggested improvements (future work)

- 3) **Each team member** using font size of 12 should Email the course instructor a one-page PDF file (no less than half a page and no more than one page) summary of their contribution towards the project. At the end of this summary each member should grade themselves and their teammates based on their contributions towards the project. This will remain confidential.

All submissions (except for the presentation slides) are due Saturday 12/09/2023, at 23:59pm.
No LATE submission will be accepted.
